

**Purpose and Objectives**

The primary purpose of school administration is to help create and to foster an environment in which students can learn most effectively. All administrative duties and functions should be appraised in terms of the contribution that is made to better instruction.

A complete and competent administrative staff is essential for the proper administration of the school division. Understaffing, poor administrators, or lack of organization can result in neglect of important phases of the school program and consequently in a less efficient operation.

The Stafford County School Board shall, upon the advice of professional educators, support an administrative structure and the competent personnel needed to staff same that will serve the educational system through support and leadership.
